Project Engineer

Career Posting – McAsphalt Engineering and Risk Management Department

Position Title: Project Engineer
Location: Toronto, Head Office
Reports to: VP Engineering and Risk Management

Responsibilities:

You will provide engineering and process support for emulsion (asphalt) manufacturing at multiple facilities. You will lead various engineering projects including plant modifications, retrofits and new construction. Your duties will include autocad design, engineering specifications, budgeting, process and project management. You will liaise with maintenance, facilities managers, R&D and quality control. You will report on various operational issues not limited to the production of quality emulsion products.

Requirements:

Successful candidates will ideally be university graduates in Mechanical or Chemical Engineering. Status as a Professional Engineer in Ontario or credentials for future status will be required. You will have experience with petroleum products or process engineering with an aptitude for various engineering disciplines. Some travel and a good sense of humor will be required.

Interested applicants are requested to apply to Human Resources, send your resume and cover letter to:
